

## Theresa Olanna's Project

Contributed by Jacki Bond  
Saturday, 11 July 2009

Theresa did a power point presentation about smoking and the harm to the lungs. She purchased a lung model which illustrated a healthy lung, smoking lung and a cancer lung. The audiences enjoyed the hands on component and the informative presentation. Theresa did a great job, saidly we are not able to upload the presentation, however, do show it too our 2009 U-DOC / North Star students as an example.
